FREWARE

TSPLUS MOBILE APP

CONNECTING THE WORLD

Working in the cloud... wherever you are, whenever you want.

With the *TSplus* Remote Desktop app, your Windows Applications are available **anywhere in real time**. All you need is an internet connection.

The App can build up any number of connections simultaneously to different sites and servers. With just one click, you are connected to the server in New York; with another click, you start your CRM app in Los Angeles.

From smartphone...

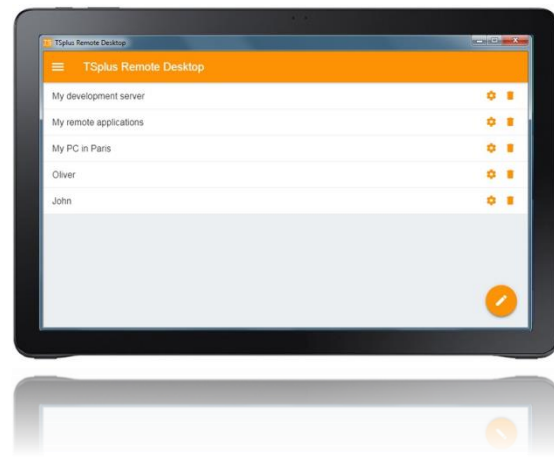

To workstation...

Mobility = Success

All end devices are compatible with the same unlimited functionality for the same operations!

TSplus Apps are available for all major operating systems as web or native apps.

- ✓ After a quick download, your devices are ready for use within a few minutes.
- ✓ Easily print any document and photo you need on the nearest local printer.
- ✓ Use *TSplus* 2FA to secure your web server

The *TSplus* App is free and has 2 pre-requisites:

- The host site must be a *TSplus* Mobile Web or Enterprise system.
- The 11.30 or newer release must be installed on this host: [Download the latest version](#).

ADD-ONS

TWO FACTOR AUTHENTICATION

ADD AN EXTRA LAYER OF SECURITY TO YOUR TSPLUS WEB PORTAL!

(Only with MOBILE WEB and ENTERPRISE, included as a 30-DAY TRIAL, 30 USERS!)

TSplus 2FA allows you to use your mobile device to access your remote session securely and conveniently.

Relying on just usernames and passwords to secure your online accounts is no longer considered safe.

Your employees are using TSplus to work from home, using their own devices to share personal and corporate data online, and then using those same devices for social media and other less secure communications and transmissions.

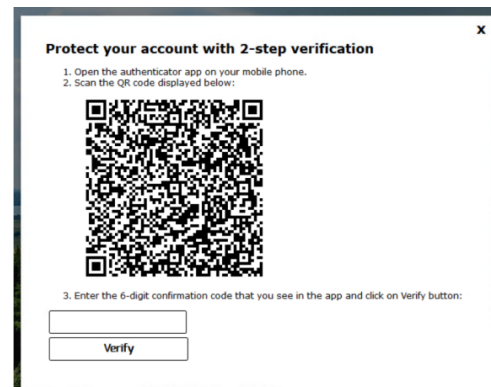

If you're an admin responsible for cybersecurity in a large organization, **you need to respond to this increased threat with efficient methods.**

All it takes is one weak link in the chain, one impatient or exhausted employee, to leave your organization vulnerable to attack.

TSplus 2FA is your key to a secure world.

By providing dynamic passcodes and multi-factor authentication, this add-on is the identity and access tool you need to secure your corporate network or your own personal data.

TSplus 2FA prerequisites on the user side:

- A personal portable device, such as a Smartphone.
- An authenticator app installed on this device. The following apps can be used to proceed:
 - [Authy](#)
 - [Google Authenticator](#)
 - [Microsoft Authenticator](#)

ADD-ONS

✓ Easy To Install and Use

Totally driverless

Just Enable TSplus 2FA and add the users and groups you wish to use this method connect to your Web Applications Portal.

It is a two steps verification process:

- **One:** At the first connection to the Web Portal, users will need to enter their phone number or scan a QR code to configure the authentication method (SMS or App) and authenticate his device.
- **Two:** At every future connection, users will need two pieces of information: their credentials and the authentication code automatically generated on their mobile device.

✓ Easy To Configure and Manage

Complete dashboard and many options

In the 2FA tab of the AdminTool, the Administrator can handle all credentials resets in just a few clicks.

You can easily configure users, choose the verification method (per user), manage SMS settings and test the feature directly. **It is simple, flexible and powerful!**

✓ Extra Layer of Security

Drastically reduce the risk of hacks!

Build strong and frictionless passwords **for your TSplus Web Application Portal.**

With a single touch, users can generate dynamic and one-time number combinations (the verification codes are generally reset every 30 seconds) to supplement static usernames and passwords for added security.

So even if the passwords are acquired, they cannot be reused or sold.

✓ Available Offline & Multiplatform

Accessible on Multiple Devices

Get two-factor authentication on your device **without any extra hardware.**

Users can authenticate using generated passwords on their device even when those devices are offline. Picking between SMS or Authenticator App allows compatibility with any mobile OS!

TSplus 2FA license is valid per server!!

ADD-ONS

TSPLUS ADVANCED SECURITY

THE PERFECT TOOL TO SECURE YOUR TSPLUS' REMOTE SERVERS!

TSplus Advanced Security offers cutting-edge functionalities and makes the use of remote access in your daily routine as safe as possible.

Most organizations assume that the hackers who threaten them will be motivated by the value of the information the company uses to provide its services. The truth is that cyber criminals don't necessarily care about the value of corporate, personal and/or financial data. Many attacks are perpetrated on systems because there's value in the processing power of the systems themselves.

As Windows infrastructures grow and evolve, it gets more and more difficult for security experts to see all the endpoints in their architecture. **And you need to know your Remote Desktop vulnerabilities to mitigate your risk.**

TSplus **Advanced Security** consists of a robust and integrated set of security features to protect against these Remote Desktop attacks. This software approach combines advanced technology as well as the latest lessons and insights our elite team of Remote Desktop cyber security specialists brings back from real-world missions.

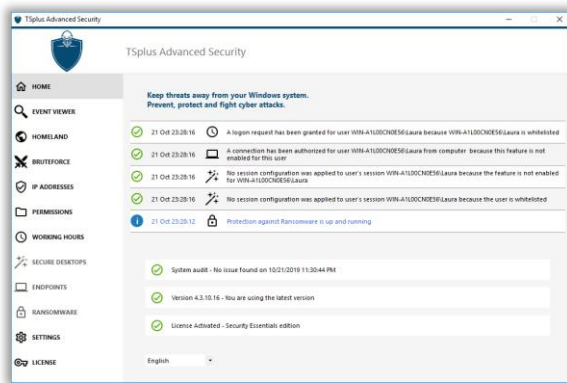

TSplus Advanced Security is available in two editions:

- **SECURITY ESSENTIALS:** the best package to keep your Remote Desktop connection safe, with powerful protection features. It is the low-cost security solution you can even apply to all W7/W10 Pro RDP accesses.
- **ULTIMATE PROTECTION:** the security tool every Windows Server administrator "Must Have": it provides everything you need to effectively protect your user environment and prohibit malicious actions.

ADD-ONS

THE 360 DEGREE APPROACH TO SECURITY
INCLUDED IN TSPLUS AS A TRIAL VERSION

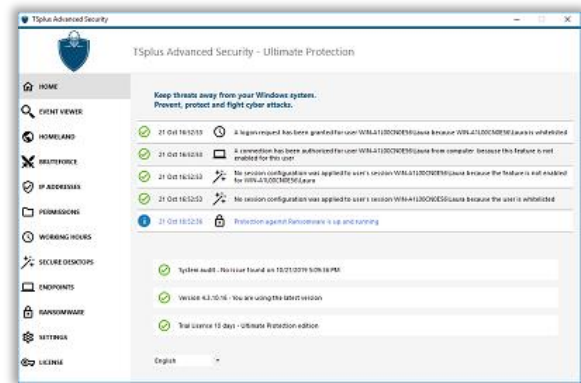

SECURITY ESSENTIALS EDITION

Included Features:

- ✓ **Homeland Protection:** Prevent attackers from opening a session.
- ✓ **Prevent brute-force attacks:** Blacklist the offending IP addresses.
- ✓ **Working Hours restriction:** Prohibit users to connect at night (for all users).
- ✓ **Permissions:** Quickly *inspect* access rights per users & groups of users.
- ✓ **IP Management:** All IPs information detected by *Homeland* and *Brute-Force* protections to manage from one place.
- ✓ **Events Log:** Displays the last 2500 events.

ULTIMATE PROTECTION EDITION

Included Features:

- ✓ All features from the **SECURITY ESSENTIALS** Edition.
- ✓ **Ransomware protection:** Immediately detect ransomware attacks and stop data encryption.
- ✓ **One click to Secure Desktop:** Provide a highly secure user environment (per user or per group).
- ✓ **End-Point Device Protection:** Restrict access per device (per user).
- ✓ **Permissions:** Quickly *inspect and Edit* access rights per users & groups.

IT JUST WORKS OUT OF THE BOX AND DISPLAYS THE MOST USEFUL DATA EXTRACTED FROM YOUR SERVER. WITH **TSPLUS ADVANCED SECURITY** YOU CAN LOG IN TO YOUR SERVER FROM ANYWHERE, AT ANY TIME, WITHOUT FEAR OF EXTERNAL ATTACKS.

ADD-ONS

VIRTUAL PRINTER

INSTANTLY PRINT FROM YOUR REMOTE SESSION TO YOUR LOCAL PRINTER!

Virtual Printer is the convenient remote printing solution to setup on your server:

- Driverless.
- Zero configuration.

Every day, organizations of all sizes need to securely print from one location, such as a main office, to another remote location that isn't on the same network or even in the same country.

The Virtual Printer enables direct printing from any remote environment to the local printer of your choice.

The user prints using the same method as if working in local. Two clicks and it is done!

Virtual Printer comes in two parts, one to install on the server and one to the client side. The Virtual Printer detects and maps the list of local printers to the server exactly as if they were directly plugged on it. Thus, the printing process is completely seamless for the user.

- ✓ **TSplus Virtual Printer is bound by your organization' security:** Print any file securely stored on your corporate network with the guarantee that your data stay safe.
- ✓ **TSplus Virtual Printer works flawlessly:** by reducing printing data volume, it speeds up data transfer for a fast and high-quality printing job!
- ✓ **TSplus Virtual Printer is the flexible Remote Printing solution** which adapts to your needs to save you time and money: compatible with most Remote Desktop software, it supports all brands of printer and works both in single and multi-users environments!

Provide immediate, secure and reliable Remote Printing to your users.

ADD-ONS

SERVER MONITORING

ALL YOU NEED TO KNOW ABOUT TSPLUS OPERATIONS!

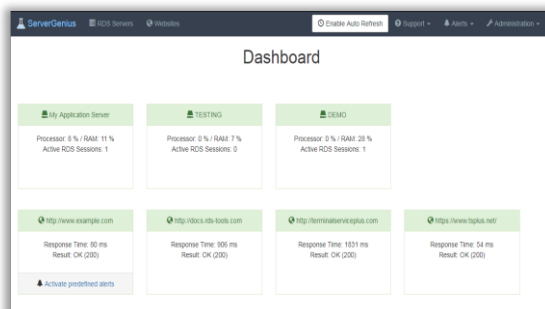

Server Monitoring is the easiest reporting solution to set up on your server:

- 30 second setup.
- Fast configuration.

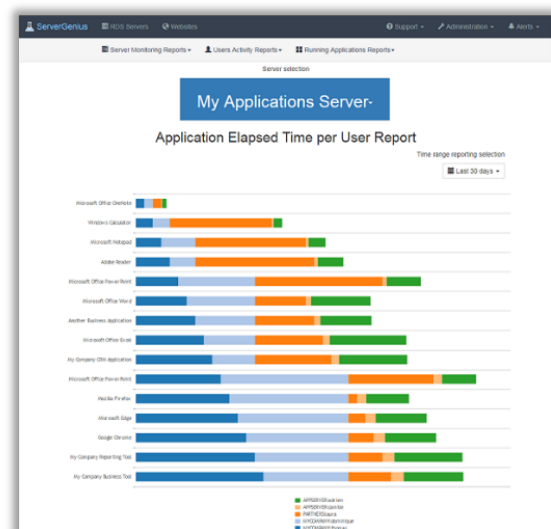

Server Monitoring gives you facts and data about your servers, applications and users.

Monitor all your server and website activities in one interface!

Reveal important audit information about applications and determine the most frequently used applications on your RDP host server.

Monitor the total time users spend using a specific app. Measure bandwidth usage, be aware of a server failure, gain important information for future network upgrades, and much more.

Detailed application usage tracking helps identify the most intense activity periods per application and per user.

ADD-ONS

MONITOR YOUR SERVERS AND WEBSITES FROM YOUR WEB BROWSER!

A collage of business-related images. In the foreground, a person's hands are holding two sheets of paper with charts. The left sheet features a green horizontal bar chart, a 3D pie chart, and a green area chart. The right sheet shows a blue vertical bar chart and a blue area chart. Below the charts, a black calculator is visible. In the background, a laptop keyboard and a blue folder are partially seen. The word "websites" is written in a white, cursive script font across the bottom right of the collage. The number "5" is visible on the left edge of the collage.

OTHERS PRODUCTS

REMOTE WORK

WHEN YOU CAN'T BE AT THE OFFICE, TAKE THE OFFICE WITH YOU!

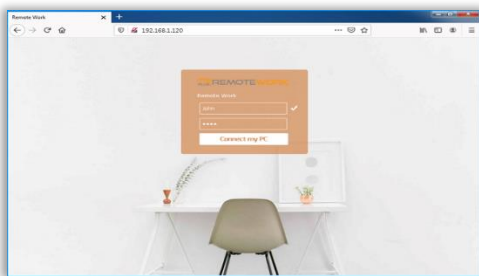

TSplus Remote Work creates a direct remote desktop connection to your office PC.

- Robust security
- Perpetual licences
- User-friendly

Out of necessity, millions of workers have been dispersed from their classic central office surroundings.

Using Remote Work to access corporate desktop PCs can save organizations enough money in licensing costs to get a positive ROI on the first day of deployment.

With TSplus Gateway Broker, users will easily initiate secure remote desktop sessions to their own office PCs.

TSplus Remote Work is the best solution to enable home working within any SMB or large corporation. Using the Remote Work Server, organizations can create a secure single sign-on web portal and remote desktop gateway, enabling users to access the console session on their office PCs – even when they're not in the office!

- ✓ The Remote Work Admin Tool is fast to install and easy to configure. No Windows Server roles to install. Admins get a streamlined interface with all the primary tools right upfront and easy to see.
- ✓ Remote Work gives users the ability to remotely access their office PCs via any device and any web browser. More than that, it connects them with the same session they would normally see when they are in the office.
- ✓ Remote Work gives organizations an all-in-one solution for keeping users connected to their office PCs. And it does it all with competitive licensing costs, low training requirements, and often with no IT infrastructure changes required!

OTHERS PRODUCTS

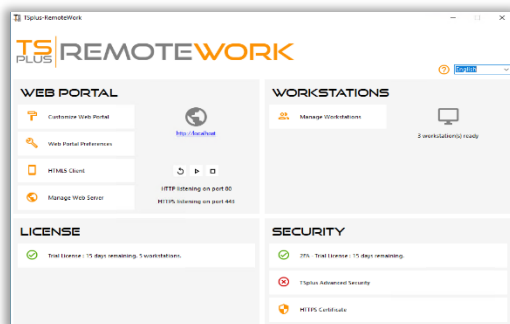

ACCESS YOUR OFFICE COMPUTER FROM HOME

DOWNLOAD THE 15-DAY/5 WORKSTATIONS TRIAL

It starts with the need to connect. It ends with easy remote access to the console session of your office desktop PC.

At every point between, *Remote Work* offers users and administrators a safe and simple toolset that enables users to keep being productive and administrators to keep corporate data secure.

From License management to web portal customization, *Remote Work* keeps management simple.

With our Remote Work software, the world is your office!

TSplus Remote Work is your perfect ally for Teleworking.

- Secure connection from any device and browser
- Perpetual licenses
- Easy roll-out

This best-in-class program is the next-generation tool that will help you access your remote connections completely safe.

OTHERS PRODUCTS

REMOTE SUPPORT

REMOTELY CONNECT TO YOUR CLIENT PCS AND PROVIDE INSTANT ASSISTANCE!

TSplus Remote Support is the ideal alternative to TeamViewer for remote desktop control and screen sharing. Provide instant remote assistance to your clients anywhere, at any time.

- Self-hosted
- Perpetual licenses
- User-friendly

A secure, web-based screen sharing and remote control solution designed for today's flexible support teams.

Securely connect to remote computers, take control of their mouse, access files and applications, and troubleshoot problems — right when your employees and customers need help the most, anywhere, at any time.

Remote Support is a simple and cost-effective remote support software. The Virtual Printer detects and maps the list of local printers to the server exactly as if they were directly plugged on it. Thus, the printing process is completely seamless for the user.

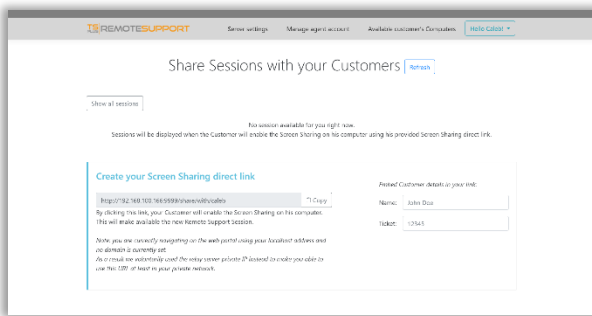

- ✓ **SELF-HOSTED:** A single Windows PC or server, hosted at the office or in the cloud, becomes the relay server and web interface for agents and end-users.
- ✓ **BROWSER-BASED:** Once the relay server is installed, the entire remote support system is web based.
- ✓ **QUICK START:** Configuration is straightforward, with internal and external network configuration options.
- ✓ **SECURITY:** Connections are secured with SSL/TLS encryption, keeping the entire process safe for everyone involved.
- ✓ **1-CLICK CONNECT:** Support agents generate a connection link for their client via the admin portal. Once the user clicks, the connection is established.
