REMOTESUPPORT

# Remote PC Control & Screen Sharing

## Web Platform

The entire Remote Support system is web-based

## Data Privacy

Connections are secured with SSL/TLS encryption

## Perpetual License

Pay once and own your Support infrastructure forever

## Provide Instant Help in a Click

With TSpplus Remote Support, the process is smooth and easy for both parts. The agent simply logs into the web portal and generates a custom link for the end-user. Next, a browser plug-in is all that is required to benefit from direct professional Support.

## Troubleshoot Faster and Better

Set up Remote Support on your server or cloud, and save on on-site service calls and desk-to-desk visits. Troubleshoot issues remotely with Windows session sharing, mouse and keyboard control, files transfer and chatbox.
