

TSplus Server Monitoring[®]

Save time and reduce unnecessary costs.

With the ability to monitor server activity in real-time, companies can avoid suffering from undetected user-based threats.

With *TSplus Server Monitoring*[®], save your company money by monitoring applications licensed “by users” and detecting over-licensed applications or even unused software!

TSplus Server Monitoring[®] helps you optimize your software, hardware and network resources. It can also help Administrators find quick-wins such as moving some users to an under-used server. Clear and concise reporting makes planning for infrastructure upgrades easier than ever.

TSplus Server Monitoring[®] gives you data about your server’s usage (CPU, Memory, I/O, Disks), application usage and users on Remote Desktop Services. Get reports on your website’s health, performance and availability.

MONITORING YOUR SERVERS AND WEBSITES HAS NEVER BEEN SO EASY!

TSplus Server Monitoring[®] is the easiest monitoring and reporting solution to setup. It is easy to install, use and maintain. Our data collection technology extracts the most useful information about Windows RDP hosts and Remote Desktop Services infrastructure from your servers and websites.

Install it on your server in 30 seconds and get a clear understanding performance and benefits. It just works out of the box, displaying the most useful data extracted from your server and website.

Track changes, resources usage and events with real-time email alerts: don't wait for your users to complain! The Web interface allows you to get a complete overview of your server and website activities even from your tablet or smartphone!

UNDERSTAND YOUR SERVER ENVIRONMENT

Check real-time RD Session Host performance at a glance.

Measure bandwidth usage, gain important information for future network upgrades, and much more. Track inventory and ensure License compliance. Never find yourself over- or under-licensed with license usage reports. Avoid penalties and decrease your costs by detecting unused licenses.

Get information about employee activities when they are connected to Remote Desktop Services.

With session recording, *TSplus Server Monitoring*® records all user activity from the moment a user logs into a Windows machine via RDP or Terminal Server.

Use *TSplus Server Monitoring*® to track monthly or daily activities, identify the most active hours, and monitor user activity by day. Monitor the total time users spend using a specific app. Reveal important audit information about applications and determine the most frequently used and the most appreciated applications on an RDP host server.

Receive real-time alerts from anywhere in the world and troubleshoot important issues faster.

TSplus Server Monitoring® performance and application analytics instantly alert IT teams to abnormal or suspicious user activity on the web interface, with enabled popups or by email.

| Name | Threshold | Action | Manage |
|---------------------------|--|--|--------|
| http://docs.rds-tools.com | Response Time > 10000 ms for at least 10 minutes | Send an email to alerts@rds-tools.ddns-net | Remove |
| My Application Server | Downtime duration > 5 minutes | Send an email to alerts@rds-tools.ddns-net | Remove |
| Accountancy | Active Users > 50 for at least 3 minutes | Send an email to alerts@rds-tools.ddns-net | Remove |
| Development Server | Processor > 85% for at least 3 minutes | Send an email to alerts@rds-tools.ddns-net | Remove |
| Development Server | Memory > 80% for at least 5 minutes | Send an email to alerts@rds-tools.ddns-net | Remove |
| My Application Server | Disk Used Space > 75% for at least 120 minutes | Send an email to alerts@rds-tools.ddns-net | Remove |

The performance and usage analytics generated by *TSplus Server Monitoring*® allow administrators to customize which events trigger alerts and how they would like to receive them. Access the reports anywhere anytime with our user-friendly web application fully compatible with tablets (iPad, Android, Surface...) and mobile phones (iPhone, Android, Windows...).

3 Editions are available:

Essentials: Monitor one Server and one Website.

Startup Edition: Monitor 5 Servers and 5 Websites.

Business Edition: Monitor 10 Servers and 10 Websites.

Server Genius is compatible with the following OSs (32 and 64-bit):

Windows 7, 8, 10.

Windows Server 2008 / 2008 R2, 2012 / 2012 R2 / 2016 / 2019.

Server Genius is a complete solution for identifying and managing user-based risks.

Track remote access to Host Server and monitor RDP sessions now!
